Axon Cyber

From Idea to Impact: Cyber Insurance Accelerated

A strategic partnership between Keylane's Axon platform and WTW's Radar.

Designed for insurers looking to capture a share of the rapidly growing cyber insurance market, Axon Cyber combines the power of Axon's technology with WTW's deep cyber expertise to deliver a fully integrated, ready-to-launch solution—streamlining operations and ensuring a seamless entry into cyber insurance.

Develop, launch, and manage your cyber solutions in a matter of months with Axon Cyber!

Why choose Axon Cyber:

▶ **1. Accelerated Market Entry**
Launch in a matter of months with minimal customisation, enabling insurers to swiftly capitalise on the growing cyber insurance demand.

▶ **2. Powered by Expert Insights**
Integrates Axon's cutting-edge technology with WTW's unmatched pricing expertise, enhancing your competitive positioning in cyber risk.

▶ **3. Flexible, Precision-Driven Coverage**
Supports complex coverage structures with adaptable cyber pricing models, providing insurers with accuracy and agility in risk management.

▶ **4. Efficiency through Automated Underwriting**
Streamlines underwriting for cyber risks with advanced automation, reducing costs, minimizing resource strain, and boosting operational efficiency.

▶ **5. Simple, Scalable Product Management**
Effortlessly manage and update products with Axon's scalable design, ensuring your cyber offerings remain adaptable and relevant as market needs evolve.

Axon Cyber Features & Capabilities

1

Combined Document & Portfolio management

Axon combines portfolio and document management to streamline compliance, enhance operational efficiency, and strengthen risk strategies.

2

Flexible Platform for Rapid Market Entry

An end-to-end solution that accelerates product design, pricing, and deployment, with modular scalability to support growth and evolving business needs.

3

Resource Optimization

Automates tasks, including Straight Through Processing (STP), to reduce manual work and allow strategic talent allocation.

4

Seamless Integration & Always-On Operations

Axon Cyber works independently from other core systems while ensuring full financial integration and 24/7 claims handling for uninterrupted service.

5

Automated Pricing Calculation and Expert Guidance

Leveraging WTW's Radar for advanced pricing models and expertise, simplifying complex calculations for accurate, market-ready pricing.

6

Comprehensive SaaS with Pre-Built Integrations

Out-of-the-box setup with 90% pre-configured integrations for faster deployment and smooth operation.

7

Legacy System Compatibility

Axon Cyber operates alongside or as a replacement for legacy systems, accommodating insurers' unique IT structures, helping you get cyber products to market without additional tech hurdles.

Cogitanda about Axon Cyber:

"Axon as a platform helps us to deliver solutions very fast to the market. Being a low code platform obviously adds an advantage to this due to the fact that the training time on a low code platform, as well as the development time, is much lower."
- *Amir Parsa, CDO Cogitanda*
