Why Keylane Disbursements?

Short time to market

For all clients Disbursements Base functionality quite alike. Since Keylane Disbursements is developed in a standard template (software + configuration) implementation is fast.

Best of all worlds

We are currently implementing our first insurer, replacing our current, older tech stack version. We are doing that in cooperation with the clients knowledge of other systems in the market, combining the best of all worlds.

Accurate calculations

Implementation is supported by a comprehensive control framework. Making tax calculation testing and comparing current versus new calculations easy.

Let’s go to the demo
